WORK

LevelUp

Designer & Front-End Developer

Boston, MA — June 2012 to Present
Develop the web and mobile user interfaces that make up our core product. Front-end engineer these interfaces using HAML, SCSS, jQuery, and CoffeeScript on top of a Ruby on Rails stack. Assist the Marketing Department with their web and print initiatives. Serve as a design catch-all for the entire LevelUp team.

Squid (Capstone)

Designer & Front-End Developer

Boston, MA — Sept 2011 to June 2012
Collaborated with Mechanical Engineering students to develop a sensitized, wearable compression shirt that integrates with a smart-phone and web application to monitor resistance exercises. The project won the Entrepreneurial Award at the 2012 Northeastern University RISE Expo, as well as garnered interest from AT&T and Under Armor.

Metropolis Creative

Designer & Front-End Developer

Boston, MA — Jan to June 2011
Designed print collateral, websites, and identities for new and existing clients. Developed pixel perfect websites using HTML5, CSS3, jQuery, and Wordpress. Frequently communicated and coordinated with clients and print vendors.

VHB, INC

Graphic Designer

Watertown, MA — Jan to June 2010
Assisted the marketing department with the creation of engineering design proposals and presentations. Developed a brand strategy for the emerging Environmental Services department. Lead the department in the redesign of antiquated brand collateral.
